

Rolling: Feels like the gentle hands of a massage therapist pressing firmly on one side of your spine, then the other. It relieves tension and loosens the muscles to prepare your back for deeper massage.

Kneading: Feels like thumbs pressing firmly in a circular motion on both sides of the spine. This therapeutic motion goes deeper, lifting and stretching muscles to improve circulation.

Compression (HTT® exclusive): Feels like the heels of a professional therapist's hands firmly pushing on muscles alongside your spine, and inward toward the spine itself. This motion improves mobility and posture.

Percussion: Feels like fists or the edge of hands rapidly tapping on your back muscles. This is the deep muscle therapy popular in sports medicine. It flexes spinal joints, relieves pressure, and invigorates your entire back.

Sitting is Believing

Model iJoy®-175

Human Touch Technology® starts with a patented mechanism that works like "wrists and arms." We added "hands"- massage rollers that move three-dimensionally on a contour track. The result is a Robotic Massage® that feels so remarkably human it is the preferred technology of the American College of Chiropractic Orthopedists and the World Federation of Chiropractic.

Easy to reach recline lever.

Child-safety lock.

Rear wheels for easy mobility.

Programmed Massage Sessions:

Full: 15 minute pre-program. Series of combined functions for your entire back

Upper: 15 minute pre-program. Series of combined functions for your upper back

Lower: 15 minute pre-program. Series of combined functions for your lower back

Everyone likes to feel good. At **Interactive Health®** it's all we think about. Our team of scientists, researchers, and engineers analyze the treatments used by massage therapists, chiropractors, and physicians, and turn those techniques into the sophisticated **Human Touch Technology®** mechanisms that animate our family of chairs. We consistently produce the most advanced **Robotic Massage®** systems ever devised.

iJoy-175

Comforting - Our designers and engineers have been responsible for the most sophisticated robotic massage chair technology for over 25 years.

Strong - iJoy®-175® is built with the finest quality materials and craftsmanship. It doesn't get tired, even if you want a massage 24/7.

Smart - With its intelligent combination of massage techniques, the chair is scientifically created for the cause and effect of a personal masseuse.

Knowledgeable - Actual massage techniques are applied through pre-set programs and can be customized to suit your personal needs.

*It's you, your chair...
what could be better?*

Inside every iJoy® Robotic Massage® Chair are the "hands" of a trained massage professional - just waiting to provide you with a soothing back massage. But don't take our word for it, sit down in one.
